presents a seminar on

Mastering Public Presentations

Tim Miller
Spoken Science

The scientific process is not just about generating ideas; it is about freely sharing those ideas with the broader world. Now, more than ever, the ability to recruit students, attract colleagues, garner attention, and secure funding is tied to your ability to successfully communicate the results of your work, both to peers and to the general public. Communications expert Tim Miller has worked with universities and museums across the country, helping working scientists from a variety of disciplines master the art of science communication. In this session, you will learn some fundamental tips and tricks for speaking publicly, as well as some valuable tools for crafting and delivering powerful presentations.

Speaker Bio:

Tim Miller is a communications expert who works exclusively in the field of scientific and technical communication. He has appeared at museums, universities, and professional societies from coast to coast. In 2010, he was hired by the National Science Foundation to develop the Creative Science Studio, a joint venture between the NSF and the School of Cinematic Arts at the University of Southern California. He is currently based in Los Angeles.

Thursday – 4:00 PM
