Tips for Preparing for the Majors Fair

- 1) Review the list of majors in the Undergraduate Catalog (<http://pubs.wisc.edu/ug/majors.html>).
- 2) Click on each major that interests you and read the description of the major. Keep track of the majors that interest you most.
- 3) Narrow your list to the majors you would most like to learn more about at the Majors Fair.
- 4) Discover more about the majors on your narrowed list using the Online Catalog and departmental websites.
- 5) Think about what questions you might want to ask at the Majors Fair. Examples include:
 - A) What interests you or students you know in this major?
 - B) Do I have to apply and be accepted? When do students typically apply? How competitive is the application process?
 - C) Do you have a list of requirements for the major?
 - D) By what semester should I begin this major so that I will graduate in four years?
 - E) How does study abroad work with this major?
 - F) Do you offer/require internships, cooperative education, or other practical experiences?
 - G) How many students are declared in this major?
 - H) Are there research opportunities within the major?
 - I) Would it be difficult to double major in ____ and ____ ?
 - J) How do I get advising for this major? Are advisors faculty, staff, peers?
 - K) Tell me some examples of career paths graduates in this major have taken.
- 6) While at the fair, have an open mind. You may have specific majors you want to talk to, but take advantage of the opportunity to chat with other programs who aren't busy. You might discover something new!

The Majors Fair is brought to you by:

Cross-College Advising Service (CCAS), The Exploration Center for Majors and Careers, and the College of Letters and Science-Student Academic Affairs.
