Allison Doerr, Senior Editor, *Nature Methods*

“Publishing in Nature Methods and the life of an editor...”

The main goal of any scientific researcher is obtaining a great result and publishing it in a well-regarded journal. Journal editors are the people that facilitate the publication process. As a Senior Editor at Nature Methods with nearly ten years of experience, I will discuss what life is like as an editor: how to get your resume noticed, what personal qualities make a successful editor, how editors spend their days, how editors add value to the publication process, and the highs, lows and challenges of the job. I will also provide some unique insights into the publication process at Nature Methods (and Nature Publishing Group journals in general) and provide tips on how to get your work published.

- Thursday October 9 at 12:15 PM
- Room 1315 in Chemistry
- Coffee and cookies
