Requirements for honors credit in Chemistry 343 (Gellman)

Students who wish to receive honors credit in the 1:20 PM/MWF section of Chemistry 343 must sign up for the honors option, earn at least a B in the course (UW requirement) AND prepare a five-page paper on a molecule of interest to them. This paper must be handed to Prof. Gellman by the last day of class, AND sent in .doc format to Prof. Gellman via e-mail.

Students planning to write such a paper MUST check with Prof. Gellman about the planned subject before working on this project. Questions may be asked in person or by e-mail.
