

DEPARTMENT OF
Chemistry
UNIVERSITY OF WISCONSIN-MADISON

Standard Operating Procedure (SOP): **Safety Training**

Anyone who wishes to participate in research in the UW-Madison Department of Chemistry and/or the Chemistry Building (including faculty, staff, and students) must first complete appropriate safety training. This training may include:

1. Chemistry Department in-person or online safety training;
2. In-person training offered by UW-Madison Environment, Health & Safety (EH&S);
3. Lab-specific safety training conducted by the research group's Chemical Hygiene Officer (CHO), the principal investigator (PI), and/or a graduate student or postdoc designated by the PI.

New researchers must talk to their PI and CHO to find out what safety training is required in the research group they are joining.
