

Organic Seminar

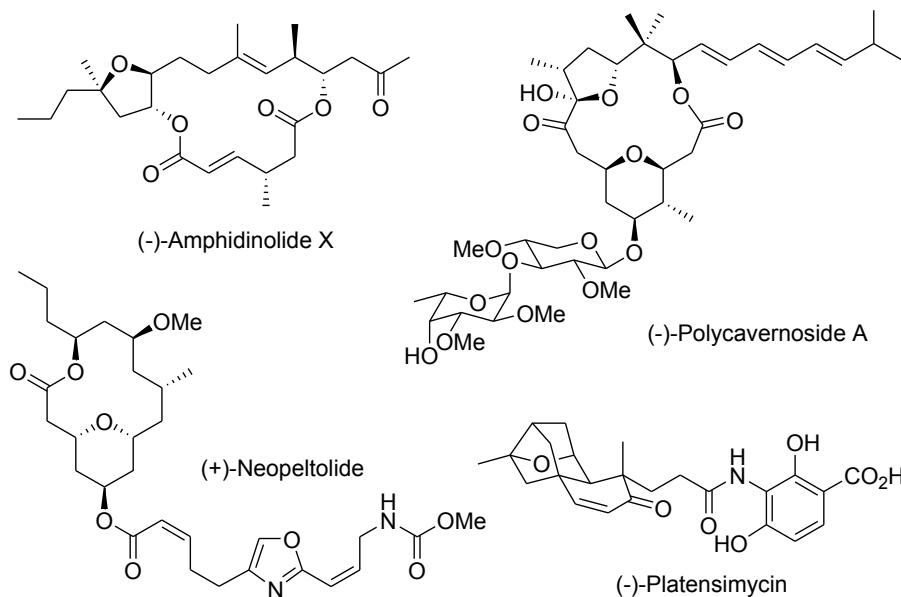

Tuesday
July 20, 2010
3:30 p.m.

Room 1315 Chemistry

Professor Eun Lee
*Department of Chemistry
Seoul National University*

Bioactive Oxacyclic Natural Products: Recent Progress

Total synthesis of (-)-amphidinolide X was accomplished via samarium iodide-mediated cyclization of an aldehydo β -alkoxyvinyl sulfoxide.¹ Prins macrocyclization reactions were employed in the total synthesis of (+)-neopeltolide and (-)-polycavernoside A.^{2,3} Intramolecular carbonyl ylide dipolar cycloaddition strategy was successfully applied in the synthesis of (-)-platensimycin and its analogs.^{4,5}
