

REFERENCE BOOKS

A. General Introduction, Reviews and History

1. Fenichell, "Plastic: The Making of a Synthetic Century", HarperBusiness, 1996.
2. Meikle, "American Plastic: A Cultural History", Rutgers University Press, 1995.
3. Grosberg & Khoklov, "Giant Molecules", Academic, 1997
4. Morawetz, "Polymers: The Origins and Growth of a Science", Wiley, 1985.
5. Mandelkern, "An Introduction to Macromolecules", 2nd ed., Springer, 1983.

B. General Textbooks on Synthetic Polymers

1. Billmeyer, "Textbooks of Polymer Science", 3rd ed., Wiley, 1984.
2. Flory, "Principles of Polymer Chemistry", Cornell, 1953 (Flory-1).
4. Gordon, "High Polymers", Addison-Wesley, 1963.
5. Tanford, "Physical Chemistry of Macromolecules", Wiley, 1961.

C. Organic Chemistry and Polymerization

1. Odian, "Principles of Polymerization", 3rd ed., Wiley, 1991.
2. Ravve, "Organic Chemistry of Macromolecules", Marcel Dekker, 1967.
3. Morton, "Anionic Polymerization: Principles and Practice", Academic, 1983.

Chem 664, Fall 2003

Handout

D. Bulk Properties

1. Ferry, "Viscoelastic Properties of Polymers", 3rd ed., Wiley, 1980.
2. Rodriguez, "Principles of Polymer Systems", 3rd ed., McGraw-Hill, 1989.
3. Aklonis and MacKnight, "Introductions to Polymer Viscoelasticity", 2nd ed., Wiley, 1983.
4. Mark et al., "Physical Properties of Polymers", 2nd edition, ACS 1993.

E. Chain Conformations

1. Flory, "Statistical Mechanics of Chain Molecules", Wiley, 1969.
2. Higgins & Benoit, "Polymers & Neutron Scattering", Oxford, 1994.
3. Volkenstein, "Configurational Statistics of Polymer Chains", Wiley, 1963.
4. Teraoka, "Polymer Solutions", Wiley, 2002
