

REFERENCE BOOKS

A. General Introduction, Reviews and History

1. Fenichell, "Plastic: The Making of a Synthetic Century", HarperBusiness, 1996.
2. Meikle, "American Plastic: A Cultural History", Rutgers University Press, 1995.
3. Grosberg & Khoklov, "Giant Molecules", Academic, 1997
4. Morawetz, "Polymers: The Origins and Growth of a Science", Wiley, 1985.
5. Mandelkern, "An Introduction to Macromolecules", 2nd ed., Springer, 1983.

B. General Textbooks on Synthetic Polymers

1. Billmeyer, "Textbooks of Polymer Science", 3rd ed., Wiley, 1984.
2. Flory, "Principles of Polymer Chemistry", Cornell, 1953 (Flory-1).
4. Gordon, "High Polymers", Addison-Wesley, 1963.
5. Tanford, "Physical Chemistry of Macromolecules", Wiley, 1961.
7. Allcock and Lampe, "Contemporary Polymer Chemistry", Prentice-Hall, 1981.
8. Elias, "Macromolecules", Plenum, 1984, Volumes 1 and 2.
9. Sperling, "Introduction to Physical Polymer Science", Wiley, 1986.

C. Organic Chemistry and Polymerization

1. Odian, "Principles of Polymerization", 3rd ed., Wiley, 1991.
2. Ravve, "Organic Chemistry of Macromolecules", Marcel Dekker, 1967.
3. Szwarc, "Carbanions, Living Polymers and Electron Transfer Processes", Intersciences, 1968.
4. Morton, "Anionic Polymerization: Principles and Practice", Academic, 1983.

Chem 654, Spring 2003
Handout

#3, 01/22/03

#3-2

D. Bulk Properties

1. Ferry, "Viscoelastic Properties of Polymers", 3rd ed., Wiley, 1980.
2. Rodriguez, "Principles of Polymer Systems", McGraw-Hill, 1970.
3. Aklonis and MacKnight, "Introductions to Polymer Viscoelasticity", 2nd ed., Wiley, 1983.
4. Bueche, "Physical Properties of Polymers", Interscience, 1962.

E. Handbooks

1. Brandrup et al., Eds., "Polymer Handbook", 4th ed., Wiley, 1999.
